

Estimating in Building Construction, 2010, 273 pages, Frank R. Dagostino, Leslie Feigenbaum, Steven J. Peterson, 0131199528, 9780131199521, Prentice Hall PTR, 2010

An update of the proven estimating text by Frank Dagostino, Estimating in Building Construction, 7/e, provides everything you need for a course in Estimating. It combines sound coverage of principles with step-by-step procedures to help students learn concepts more easily. Ideal for construction, architecture, and engineering students, it reflects the popular approach of tracing a complete project's progress. Added in this edition is a discussion of computers in estimating, different types of estimates (e.g., square foot, project comparison, and assembly estimating), how to determine labor productivity, and how to determine labor burden. Plus! A companion student website, "MyConstructionKit", is now available! MyConstructionKit is an online resource that offers a wealth of study tools to engage students for a variety of Pearson construction management, architecture, and civil engineering technology textbooks!
